Sleeve Length - CB	32"-33 1/2"	34"-35"	35"-36"	36"-37"	37"-38"	38"-39"	38 1/2"-39"

## Printing Instructions

Due to the nature of Nylon fabric, special care must be taken throughout the decoration process. Here are some tips to effectively decorate our performance products.

- Garment temperature must not exceed 290°F or 143°C. Exceeding this temperature will cause the fabric to shrink, become wavy or cause dye migration.
- Dryer temperature and belt speeds must be changed accordingly for nylon fabric.
- If flashing these garments, do not exceed 1-2 seconds. Anything longer may damage the fabric as stated above.

**EMBROIDERY:** Embroidery is recommended for this garment. An embroidery access zipper is included in the inside liner

### SCREEN PRINTING/HEAT TRANSFERS:

- Garment temperature must not exceed 250-290°F or 120-155°C.
- Use fast fushion/low cure temperature ink to help prevent the need for a higher temperature to cure the ink.

**A test sample run is recommended, especially if you have a large order or if your printer does not specialize in printing on nylon fabric.**
